- Compact and light-weight
- Easy to use
- Proven technology to convict criminals
- Invisible marking solution

It can be deeply scary to be alone in public places. Whether travelling to and from home, or carrying out jobs in a public setting, vulnerable people can be allowed to feel much safer through the possession of a deterrent such as the cutting-edge SelectaDNA Personal Defence Spray.

Criminals who are sprayed with our SelectaDNA solution will be marked for weeks, making it easy to connect them back to a crime scene.

## How Does it Work?

The SelectaDNA Personal Defence Spray works by spraying the offender with an invisible synthetic DNA solution, marking skin and clothing for days, weeks, or even months - greatly increasing the chances of conviction.

The solution contains a unique DNA code that is registered to the user's canister. When Police use UV lights on marked criminals or locations the solution shows up in a clear fluorescent blue.

The unit is operated with one hand. By holding the canister in an upright position and pressing with a thumb or forefinger, you will be able to fire a jet of clear liquid that reaches a distance of up to 4 metres.

## Product Specification

- Designed for quick deployment, the unit is pocket-sized and easy to use.
- Protective cap comes with clip used to secure the unit to the inside of a handbag or jacket lining.
- Content: 20 ml SelectaDNA liquid (water, UV and unique DNA)
- Range: 3-4 m
- Dimensions: H 107 mm, Ø 22 mm
- Weight: 32 g

## Keeping Women Safe

Due to the recent high-profile instances of horrific attacks, awareness of violence against women and girls is at an all-time high.

The SelectaDNA Personal Defence Spray has been developed specifically to help women feel safer in public, and to secure the convictions of dangerous criminals who threaten them. The sooner this terrible injustice is brought to an end, the better.
